

Is the Ukraine energy support fund restoring domestic generation capacity?

While the Ukraine Energy Support Fund is currently restoring and installing 2 GW of domestic generation capacity ahead of winter, a significant gap to cover the restoration needs still remains. We therefore encourage the international community to continue contributions.

Does Ukraine need a new energy system?

The war in Ukraine, which has caused immense suffering and resulted in the destruction of critical infrastructure, demands urgent action to rebuild the country and its energy system. Today, Ukraine heavily depends on fossil fuels, which accounted for some 70% of its primary energy supply in 2020.

Is Ukraine's electricity system mapped before 2022?

A research team with Florian Egli, Professor of Public Policy for the Green Transition, and Iryna Doronina, visiting professor at the Chair of Energy Systems, has therefore produced the first comprehensive mapping of Ukraine's electricity system before the 2022 attack and of the subsequent destruction during the war.
