A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.

An uninterruptable power supply (UPS) is a type of
backup battery that will continue to provide electrical
power to the electronics that you have plugged into
it even if electricity from your home outlets cuts out.
Unlike a backup generator, it does not need to
power up in order to start generating power. In other
words, if you experience a

UNINTERRUPTED POWER SUPPLY FOR HOME

Unlike the batteries in other devices around your home, like your smartphone and Bluetooth speakers, Uninterruptible Power Supplies don't use lithium-ion batteries. The batteries in your UPS are lead-acid batteries, like the battery in your car.

CyberPower designs and manufactures a complete line of uninterruptible power supply (UPS) systems to meet the full spectrum of power protection needs from enterprise applications to home office and entertainment systems. Award-winning Backup UPS is ideal for small business and home applications.

An uninterruptible power supply (UPS), also known as a battery backup, provides backup power when your regular power source fails or voltage drops to an unacceptable level. A UPS allows for the safe, orderly shutdown of a computer and connected equipment. The size and design of a UPS determine how long it will supply power.

Include all of the devices the UPS will need to support. If a piece of equipment has a redundant power supply, only count the wattage of ONE power supply. If you are unsure how many watts your equipment requires, consult the manufacturer or power supply specifications in the user manual. Here is an example of an equipment list to verify the load:

The UPS or Uninterruptible Power Supply is a fantastic appliance to add to your home. They provide power to your computer, television, or other devices when the power is out. They can even be used to charge your cell phone, tablet, or laptop in the same event. By selecting the best UPS for home use, you'll be able to safely power and protect

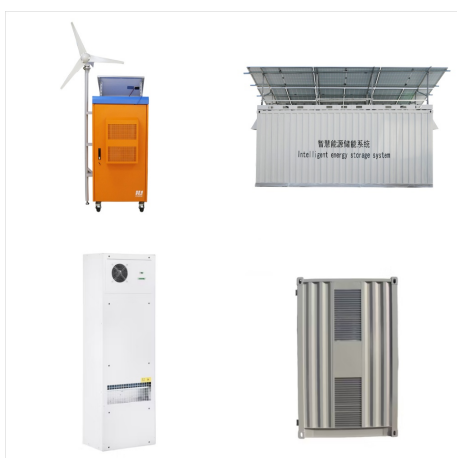

UNINTERRUPTED POWER SUPPLY FOR HOME

If you want to keep your home and office electronics in good working condition, choose a reliable uninterruptible power supply (battery backup) to prevent downtime and protect your equipment such as computer, server, TV, router, etc. from voltage fluctuations. To make your choice less tricky, we've compiled five best UPS models in this review.

The requirements for a home UPS (Uninterruptible Power Supply) are unlikely to be as intensive as what you require for business with an expected operating range of 0-5kVA. If the only thing you're concerned with is keeping power to your desktop, a simple plug-in UPS system will suffice. But if you wish to keep a number of items running, it
