

Does the UK offer government grants for solar panels on commercial buildings?

Currently, the United Kingdom does not offer government grants for solar panels on commercial buildings. On the other hand, the UK government has also applied 0% VAT on goods like solar panels and sustainable technologies which can save purchase costs immensely.

Do I need a permit to install solar panels in the UK?

There is no permit required for commercial solar installation in the UK. As solar panels are considered 'permitted development' you usually don't need planning permission to install them on your roof. A grid application would be required to connect to the grid. This would all be part of our design package.

Are solar panels a good investment for your business?

Solar panels should be the go-to energy micro-generating solution for businesses across the UK. Not only do they help businesses save money on energy costs, but they also help promote your business as environmentally-friendly. The majority of businesses operate in the daytime, so it makes financial sense to switch to solar energy.

What are the benefits of commercial solar panels?

Reduced costs, energy efficiency, and energy independence are among the main benefits of solar panels for businesses. On average, commercial solar panels can break even in 4 or 5 years due to their high solar absorption capacities. The best solar panel companies for larger arrays include LG, Sharp, SunPower, Panasonic, and Yingli Solar.

Can a business get a grant for solar panels in Dorset?

By switching to energy-efficient measures, including solar panels, businesses in these areas can get a grant of £5,000. Businesses looking for solar panels in Dorset get an even better deal. With the Low Carbon Dorset scheme, you can get grants for up to 50% of your low carbon project costs, between £1,000 and £75,000.

Are commercial solar panels right for your business?

Commercial solar panels can be beneficial regardless of whether your company is large or small. Most
