What is an ups & how does it work?

The acronym UPS stands for Uninterruptible Power Supply. Essentially,if the power goes out,your devices shouldn't do. This allows you to shut down and save work or turn devices off safely. As such,UPS devices are rated for power (the amount they can supply) and LCD models will advise how run time they have in them too.

So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use. While UPS power is great for avoiding a sudden shutdown, you should not expect it to power your equipment for long hours without additional electrical backup, such as a generator.
