

Why should you buy an ups?

Ideal for keeping mid and high-end computer systems safe,the UPS comes with Automatic Voltage Regulation (AVR) to ensure safe voltage levels for all devices that are connected. It has featured data line protection that protects communication and network equipment from power surges and spikes.

What is the best ups for home use?

The Runner Up on your best UPS for home use in the ~30 minute category is the APC SMT1500 Smart UPS. The desktop form factor makes it nice and compact, and mostly silent, albeit somewhat bulky when using in something like a theater room closet, so we've selected it for our runner up position.

Should I buy a ups for my home?

You may find that you're plugging in a lot more power-hungry devices into your home power supply,and this could lead to power cuts or power surges. Your home likely won't have the power backup solutions that your office does,so buying a UPS for your home could be a very wise investment.

What is an ups & how does it work?

The acronym UPS stands for Uninterruptible Power Supply. Essentially,if the power goes out,your devices shouldn't do. This allows you to shut down and save work or turn devices off safely. As such,UPS devices are rated for power (the amount they can supply) and LCD models will advise how run time they have in them too.

Why should you use an ups power supply?

While UPS power is great for avoiding a sudden shutdown,you should not expect it to power your equipment for long hours without additional electrical backup,such as a generator. The main purpose of a UPS is to give you time to switch to alternative power or properly shut down your machine. Benefits of an uninterruptible power supply.
