

Wir forschen an der Zukunft und entwickeln individuelle Hochleistungselektronik, Zellkühlungssysteme und Second-Life-Use Konzepte. e.battery systems ist ein Start-Up mit Historie. Was 1995 als Familienbetrieb begonnen hat, gipfelt 2021 in marktfährende Technologien mit Flexibilität, Schnelligkeit und Innovationskraft als Patent.

Standard battery systems for electromobility are expedient in terms of handling, precision fit, and pricing. Our battery systems combine the best aspects of standardization and made-to-measure production. They are suitable for a wide range of application areas yet can also be quickly and simply adapted to customer specificities. In

We develop individual high-performance electronics, cell cooling systems and second life use concepts. Success and Inspiration We have an ever-growing range of successful cases; check out some of our past and ongoing projects here, each ???

e.battery systems is a multidisciplinary battery producer which has become adept at developing customer-specific solutions. At the nexus of standard systems and bespoke battery systems, we implement extraordinary projects across the world. The development of innovative battery systems is our number one priority at e.battery systems.

The ADB is proposing a large scale, solar-plus-battery system in Uzbekistan. According to a listing on ADB's website, the Samarkand 1 Solar PV and BESS Project will involve the construction of two solar power plants, of 100 MW and 400 MW, a pooling station, 500 MWh BESS, loop-in loop-out transmission lines, and a 70 km overhead transmission line.

FSM AG develops and produces intelligent electronics. We support our customers with electronic solutions in the disciplines of battery management systems, measurement technology and transformer switches as well as in the field of development and manufacturing services for electronic components (E?MS). Our work is mostly customer-specific and

The battery system consists of 11 battery packs connected in series and forming a battery rack. Each battery pack consists of 40 battery cells (2 strings with 20 cells each). The main characteristics of the battery pack are 64V, 192A*h, 12.29 kW*hour. The nominal voltage of the battery rack is 704V, the minimum voltage is 616V, the maximum
