The new modular DC high-voltage storage from VARTA is equipped with state-of-the-art 21700 round cells and thanks to the VARTA double module, the storage is the slimmest system on the market with an installation depth of only 10 cm?, with very high energy density. Made in Germany.

Lithium-Ion cells: VARTA storage systems have an energy density four times higher than that of lead-acid batteries and a discharge depth of 90 percent. Furthermore, the high quality standard of the storage system ensures that charging and discharging run reliably, without the so ???

Unser neues Portal VARTA.energy ist unsere beiden bisherigen Portale VARTA Storage und VARTA Portal vollständig ab. Wir haben unser Portal für Sie weiterentwickelt: Freuen Sie sich auf ein modernes und intuitives Nutzererlebnis, schnellere Ladezeiten und mehr Stabilität. Außerdem erhalten Sie in Zukunft stetige Updates mit weiteren

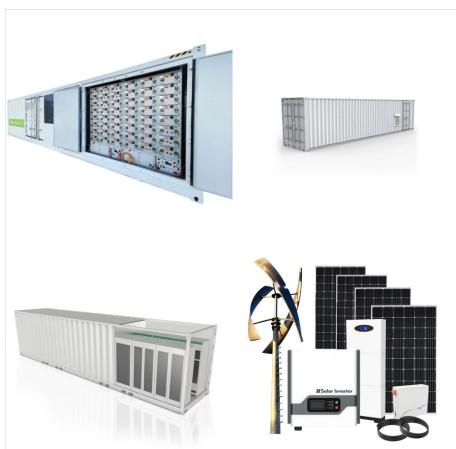

Rainer Hald, CTO of VARTA AG: "For the German battery community, this project represents a milestone in the development of sustainable sodium-ion batteries. In order to further advance the future of decentralised energy storage and use, other innovative and powerful storage technologies are needed in addition to lithium-ion technology."

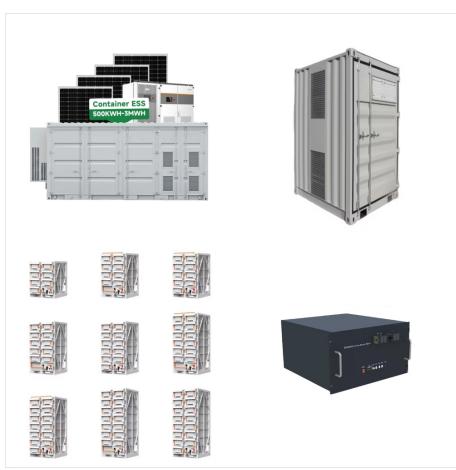

With a VARTA energy storage system, you can temporarily store the energy you have produced yourself and use it when you actually need it. This way, you can use green energy 24 hours a day and increase your self-consumption to 80% and more. Get to know more about VARTA

VARTA Storage has expanded its product family of energy storage systems for private households with the addition of VARTA pulse. The small, compact energy storage system is available in two classes: 3.3kWh and 6.5 kWh. "Easy, affordable but of high quality ??? this is pulse. It's perfect for all those who want to bundle the highest energy

The VARTA element backup offers an emergency power function for selective users, which can be realised through the VARTA emergency power box. In the event of power failure, the energy storage system automatically switches to emergency power operation. In addition to that, the VARTA element backup is also capable of black start.
