Prices are forecast to fall even further by the end of this year to \$111. Continued technology improvements will lead to average battery prices falling to \$80 kWh by 2026. This will amount to a 50% drop from 2023 and reaching a level at which battery EVs would achieve ownership cost parity with gasoline-fueled cars in the U.S., Goldman Sachs said.

Vatican: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
