Using second hand Trina Solar 310w panels in a series of six mounted on the lean-to roof. This system is intended to power my greenhouse fans, heat mats, and workshop needs. Tomorrow is my first power up. Fingers crossed. The batteries are charged and waiting to be hooked up, but the panels won"t be mounted to the lean-to roof until January.

This profile presents a snapshot of the electricity generation and reduction technologies, including solar hot water heating, available to Turks and; Caicos - a British overseas territory consisting of two groups of islands located southeast of the Bahama s.

Install Solar Panels: Turks and Caicos Islands have abundant sunshine, making it an ideal location for solar energy. Installing solar panels can significantly reduce electricity bills and help promote renewable energy. Use Fans Instead of Air Conditioning:

The two shallow Caicos and Turks banks are separated by a deep ocean passage, the 35-km-wide Turks Island Passage, which reaches depths of 2200 m, while the Caicos Bank is separated from Mayaguana Island and the other southern Bahamas islands of Great and Little Inagua by the 70-km-wide Caicos Passage with maximum depths approaching ???
