VINCI Energies is a business-line of the international group VINCI dedicated to energy and digital. Our goal is to improve people's lives by contributing every day to the achievement of two important changes: ENERGY transition and the DIGITAL transformation.

VINCI Energies is the business-line of the international VINCI Group dedicated to energy and digital. The goal is to improve people's lives by contributing every day to the achievement of two important changes: the ENERGY transition and the DIGITAL transformation.

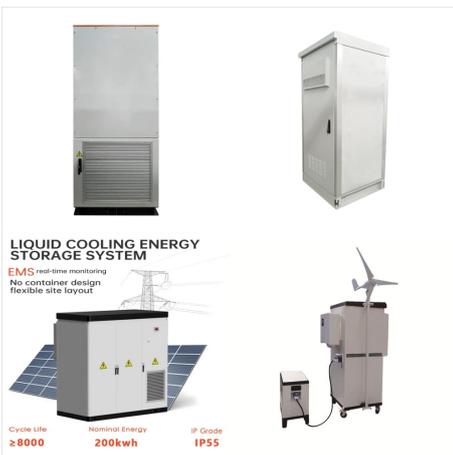

VINCI Energies, the VINCI subsidiary specialising in the design, installation and maintenance of electrical, thermal and communications systems, has completed 12 external growth operations since the beginning of 2006. Together, they total full-year revenue of a?180 million, of which 60% generated outside France. The operations were carried out in:

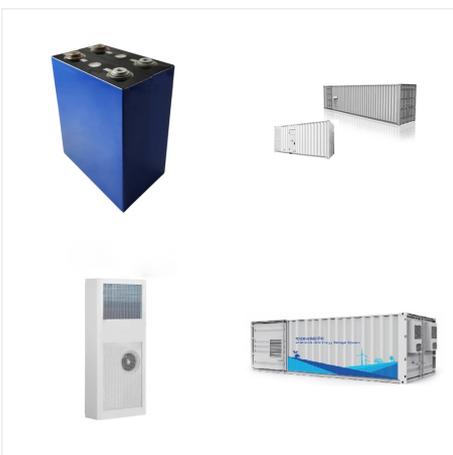

VINCI Energies helps electricity producers, transmission and distribution system operators and local and regional authorities fulfil the promise of the energy transition by fostering access to electricity, ensuring secure supply and developing sustainable energy.

SPW - The Euro 25 prepayment top-up card. A stock of these cards are purchased from VINCI by the landlord. Whenever the tenant starts running out of electricity credit the landlord will sell a card or cards to the tenant. These cards are inserted into the prepayment meter to a?)

5 . VINCI Energies helps electricity producers, transmission and distribution system operators and local and regional authorities fulfil the promise of the energy transition by fostering access to electricity, ensuring secure supply and developing sustainable energy.

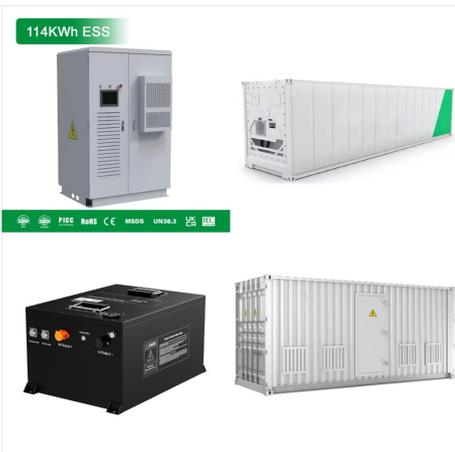

Going back to its longstanding business model that was founded at the beginning of the 20th century on electricity concessions, VINCI is now financing, developing and operating renewable energy production sites, such as the mega-solar power plant commissioned in 2023 by Cobra IS in Belmonte, Brazil.
