Cabo Verde alberga actualmente o Centro Regional de Energias Renov?veis e estamos a criar compet?ncias e condi??es para atrair We want to reach 50% penetration of Renewable Energy by 2020. Cape Verde is a rich country in Renewable Energy resources. We have a strong and constant wind on several islands.

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renewable energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.

The project was a huge success and to this day remains one of the most important and influential strategic studies in the energy sector of Cape Verde. The Renewable Energy Atlas includes the strategic identification of resource ???
