A: While solar panels can be installed on almost any type of roof, there is an ideal roof for a solar installation. If done properly, a solar installation should last 25 - 30 years. Consequently, a roof should be prepared to last the same period of time. It is worth noting that a solar panel installation can extend the life of your roof.

Any recommendations on the best panel type to use in an environment like The Bahamas? It's the same as Florida - hot and humid, and hurricane prone. Would you recommend mono or poly panels? And the best brands in 300 watt - or thereabouts - panels. Thank you.
