

Are solar stocks falling?

Despite today's move, solar stocks have been falling for over a year. Traders may have seen enough sentiment to push shares higher today, but the fundamental problems facing these companies haven't changed.

Why are investors selling solar stocks?

Why are investors selling solar (and hydrogen) stocks? The reasons renewable energy investors are frightened take multiple forms. Sunnova for example could be a huge loser if new Trump tariffs against solar panels imported from China take hold and strangle its supplies.

Is first solar a good stock to buy?

Nothing good, it seems, according to investors. As of 9:50 a.m. ET, shares of solar panel producer First Solar (FSLR -9.06%) are down 18.9%, while solar power provider Sunnova Energy International (NOVA -50.21%) crashed a staggering 43%.

Will solar energy stocks skyrocket on little news?

Solar energy stocks were among the biggest beneficiaries on Monday as some companies in the energy sector saw their shares skyrocket on relatively little news.

Why are solar stock prices so high?

The stock prices of companies engaged across the solar sector in the U.S. have reflected the tough operating environment the firms have faced throughout the country, regardless of their particular function in the industry.

Why did First Solar stock soared?

First Solar shares soared after UBS analysts boosted their price target on the stock, noting the solar panel maker is poised to benefit from tax credits. Shares of Nordson Corp. sank after the industrial equipment maker lowered its full-year outlook, citing challenges in its electronic end markets.
