Wholesale Solar Battery for sale! A solar battery is a device that is charged by a connected solar system and stores energy as a backup for consuming later. Users can consume the stored electricity after sundown, during peak energy demands, or during a power outage. Why Use Solar Power Storage? Using a solar battery can help users to reduce the amount of electricity they ???

Since battery tech is expensive (SM's solar panels dont have batts), solar is only good for peak loads like airconditioning that happen to coincide with peak sunlight. After sunset when its still hot due to the sun's heat stored in the ground and in concrete walls plus the turning on of lights, the electricity consumption is still significant.
