

Who owns the energy project in Zambia?

Wholly owned by Zambian entrepreneurs, the project supports the diversification of Zambia's energy matrix and an increase in access to reliable and affordable power, a critical component of the country's long-term competitiveness and sustainable economic growth.

What companies trade in electricity in Zambia?

Private companies also trade in electricity in Zambia. The largest of these, Copperbelt Energy Corporation Plc (CEC), buys electricity primarily from ZESCO and sells it to the various mines in the Copperbelt Province. It also operates its own generators, most of which run on fossil fuels.

What will Zambia's energy demand look like in 2040?

The government anticipates that peak demand will be at 8,000 MW by 2030 and 10,000 MW by 2040 (from around 3,000 MW in 2022). It also projects that the demand will be largely driven by mining and agricultural consumers and not residential consumers as projected in the COSS (Government of Zambia, 2022). 4.

Zambia's renewable energy landscape

Does Zambia have a good solar system?

Zambia benefits from excellent solar resources, with a specific production output between 1,600 and 1,800 kWh/kWp per year. The regions with the best re-sources are the south-west part of the country as well as the region around Lake Bangweulu, east of Mansa.

Will the demand for power continue to rise in Zambia?

While the Zambian government accepts that the demand for power will continue to rise in Zambia, it has taken the view that the demand will be much higher than the 95% projected under the COSS.

Does Zambia export electricity?

Electricity imports and exports in GWh (first half of 2022) As mentioned in the previous chapter, Zambia has developed into an export powerhouse in recent years. This is also demonstrated by the data from the first half of 2022.
